

# WES EDRINGTON

## SENIOR RISK ANALYST

Wes Edrington joined the MJ team in 2018 as a senior risk analyst in our Risk Management + Commercial Insurance department. Prior to joining MJ, Wes was a business analyst for MOBI Wireless Management.

At MJ, Wes is responsible for developing MJ's analytics systems and tools to provide the analysis and insights needed to advance decision making when it comes to the risk management strategy of our Risk Management + Commercial Insurance clientele. Along with the rest of the Analytics team, Wes works to determine best practices for the extraction, storage, organization and analysis of carrier loss data, exposure data and policy data with a goal to provide a descriptive picture of past trends, predict future trends, and assist the rest of the team in prescribing solutions to best meet the risk management needs of MJ's clientele. Since joining MJ, Wes has enjoyed being able to create a story through numbers and data to show clients a perspective that may impact future trends in their risk management programs.

Outside of work, Wes enjoys playing slow-pitch softball with friends and considers himself a bar trivia enthusiast. He also loves to attend concerts, play guitar, and work on his hidden talent of songwriting. Wes hopes to someday fulfill his bucket list dream of traveling to Spain.

### EDUCATION

University of Nebraska - B.S. Physics & Mathematics and MBA
